

Telescopic Original Line Cylinder

A waste treatment customer needed a way to automate the cleaning of large, bacterial-killing UV bulbs. Bimba enabled its Original Line cylinder to extend telescopically, in two stages, to an overall length of 25.36". A brush mounted to the end of the rod extended and retracted across the bulbs, removing any build up.

Specifications

- Body: 303 Stainless Steel
- Rod: 304 Stainless Steel
- End Caps: Aluminum Alloy
- 1st Stage Bore: 1 1/2" (17 Series)
- 2nd Stage Bore: 1 1/16" (09 Series)
