

Free Air System Assessment!

Is your plant's compressed air system stealing dollars from your bottom line?

Fact: For every \$1.00 spent on energy for compressed air, only \$0.12 comes out as useful work performed.

Fact: On average, 25% of air costs in a plant are attributable to simple leaks

Fact: Another 25% of air costs can be associated with inappropriate uses or artificial demand

Let the pneumatic experts at TSI Solutions help you put a stop to this unnecessary loss. We will address the following items and give you a written assessment:

- 1) Map out plant responsibilities for air system maintenance
- 2) Review design and layout of air system
- 3) Identify common sources of leaks
- 4) Review the condition of your air system components—filters, regulators, lubricators, drains, air piping, etc.
- 5) Identify inappropriate uses of compressed air
- 6) Evaluate the need for a comprehensive air system audit and provide a formal quotation

For a free air system assessment, contact your TSI Sales Engineer at 1-800-342-4874.
