12-pin *euofast*® Connectors: More Pins in a Small Package

Minneapolis, Minn. – **TURCK Inc.** has expanded its line of M12 *euofast* connectors to handle even more applications with the addition of a 12-pin connector in a compact molded body. Twelve-pin connectors are commonly used in motor environments, material handling and safety industries.

The 12-pin connector adds to the existing 4, 5, 6, 8 and 10-pin *euofast* line. Multiple connector styles are available, including a connector with the shield tied to the coupling nut to provide electromagnetic and radio frequency interference protection. The *euofast* cordsets are available with many cable options, such as PVC, PUR and TPE.

Like most **TURCK** cordsets, the *euofast* cordsets offer male or female, straight or right angle connectors, standard and custom lengths, and pigtail or extension cordsets. To make the system complete, we offer mating front and rear mount receptacles.

TURCK is an industry leader providing superior quality sensing, connectivity and network products to help manufacturers improve their automated processes. For other **TURCK** product or technical information, contact:

1-800-544-7769 • www.turck.com • turckusa@turck.com
